

Oracle ULA Certification (Exit) Or Renewal Process – 12 Key Steps

Description

Oracle ULA Certification is the process to be followed at the end of the ULA contract term to count the number of Oracle licenses deployed, send this count as a declaration to Oracle and obtain a certified grant of perpetual licenses.

Oracle ULA Renewal is when you want to enter a fresh term for the same or different set of products.

Both these events require detailed planning and internal due-diligence. Our Oracle License Experts can help you get the highest return on your ULA investments and mitigate future compliance risks
