SAP Licensing Basics

Description

[vc_row][vc_column][vc_column_text]Details of SAPâ??s pre-2018 licensing are discussed elsewhere on the site. This post provides the basics of the changes made by SAP in 2018.
SAP has two license types:

- Direct/Human access which will be charged for by number of human users.
- Indirect/Digital Access: Access via third party, Internet of Things (IoT), bots and/or other digital access that can be licensed based on transactions/documents processed by the system itself.

Notes:

1. SAPâ??s new model pertains to the digital core â?? SAP S/4HANA and SAP S/4HANA Cloud â?? as well as the SAP ERP application.
2. Existing customers can choose to remain on the current model or move to the new document-based pricing model â?? whichever best fits their SAP solutions and digital transformation initiatives.
3. Conversion offerings are available to help customers who choose to move from current pricing to the new model.
