

Windows 11 22H2 Causing Performance Issues On AMD Ryzen 7000 CPUs

Description

If this is the same issue that was causing my monitor to show an “out of range” signal, then it doesn’t appear to be happening to me anymore on my RX 6700. Didn’t happen at all on my RX 580 I recently upgraded from. Radeon™ Super Resolution may fail to trigger after changing resolution or HDR settings on games such as Nioh™ 2. I play mostly VR Simulation games like DCS World and Assetto Corsa.
